STATUS 270 Antennas

The STATUS 270 is a compact, omni-directional antenna system designed to keep you connected wherever you travel. Its low-profile design and streamlined mounting foot make it a practical choice for caravans, motorhomes and campervan conversions, while omni-directional reception picks up TV signals through 360° without the need to point the antenna.

The range offers a choice of TV-only and 4G/5G LTE setups to suit different connectivity needs. Available in black or white, the 4G/5G LTE models pair the antenna with either a 4G or 5G SIM router, providing a reliable Wi-Fi system on the move. Whether you need TV reception, internet connectivity or both, there's a STATUS 270 to suit the way you travel.

270 DIGITAL TV ANTENNAS

- Designed and manufactured in the UK.
 - Ideal for campervan conversions
 - Low aerodynamic profile
 - Lightweight compact design

VISION PLUS

STATUS 570 Antennas

Since 2001, the STATUS 570 has set the standard for fitted directional TV reception in caravans, motorhomes and boats. Now in its third generation, it continues to evolve with the needs of modern travellers. The latest 570 features an LTE-protected dipole for reliable TV reception and compliance with current standards.

The latest addition to the range, the STATUS 570 4G/5G LTE, combines directional TV reception with an integrated 4G/5G LTE antenna, providing a complete solution for staying connected on the move. Available with either a 4G or 5G SIM router, the system uses the LTE antenna to maximise cellular reception, while the router provides a Wi-Fi connection for your devices.

All STATUS 570 systems feature our latest VP5 Class 1 powered amplifier with built-in TV signal finder, making setup simple and helping you find the best available TV signal.

570 DIGITAL TV ANTENNAS

- Designed and manufactured in the UK
 - Roof mounted amplified antenna and mast
 - Powerful Digital UHF, FM & DAB performance
 - Integrated Amplifier and TV Signal Finder
 - Triple TV outlets with signal gain adjustment

VISION PLUS

Want Wi-Fi without drilling another hole in your roof?

Many caravans and motorhomes from the UK's leading manufacturers are fitted with a STATUS 570 as standard. If yours already has one, you don't need to take a drill to your roof to add Wi-Fi.

Our 570 LTE 4G or 5G upgrade kits simply replace your existing antenna with the STATUS 570 Combi TV & LTE 4G or 5G units, using the roof assembly and TV amplifier already in place. No new hole. No new roof work. Just swap the antenna and upgrade your setup.

570 Upgrade Kits come in 4G or 5G router options.

Put away the power tools. Add Wi-Fi.

VISION PLUS

STATUS 350 Antenna

Launched in 1992, the STATUS 350 is our most successful omni-directional antenna and has remained a firm favourite ever since. Its distinctive design combines quality, performance and versatility, making it a trusted choice for tourers.

The latest evolution brings improved reception and performance in a lower-profile design. The STATUS 350 provides UHF TV reception through the VP2 amplifier, while we also offer the option of adding FM radio reception through the VP3 amplifier.

Proven technology, built on decades of experience, to keep you connected to the TV and radio you enjoy wherever you go.

- Designed and manufactured in the UK
- Digital television, and with the VP3 amplifier version, FM radio reception
- Receives horizontal and vertical signals through 360°
- Powered amplifier with variable gain adjustment
- Fittings for roof, mast mount or optional sucker mount
- Angle adjustable for level mounting on a sloping surface
- Easily removable antenna dome

STATUS 4G & 5G Routers

Stay connected wherever you travel with our portable STATUS 4G and 5G Wi-Fi routers. Designed either for use with our roof-mounted STATUS 4G/5G LTE antennas, or as standalone Wi-Fi units. Our routers are unlocked to accept any SIM and feature an easy-to-use on-screen display.

The routers clip securely onto the STATUS Power Base, which provides 12–24V power and charges the router's internal battery.

Connects to STATUS 4G/5G LTE antennas to maximise reception, while the portable router lets you take your connection with you.

Available in 4G and 5G models, with download speeds of up to 3800 Mbps on the 5G router.
